Physical Characteristics

Area - 64 acres Temperatures
 Surface - 78° F.
 15 feet - 66° F.

Maximum depth - 17 feet

Principal Fishery: Largemouth bass, White perch, Chain pickerel

The original survey of Moose Pond in 1957 found it ideally suited for warmwater fishes. The Regional Biologist recommended the introduction of largemouth bass when local anglers expressed sufficient interest. Members of the Parker Pond Association became interested and bass were introduced in 1961. Subsequent surveys have determined that largemouth bass are well established and provide good fishing.

Access to Moose Pond is limited to canoes and small hand carried boats.

Surveyed - July, 1957
Resurveyed - 1963
Revised - 1974, 2001
Maine Department of Inland Fisheries and Wildlife Funded in part by Federal Aid in Restoration Act under Federal Project F-28-P
